

## **To increase Total Alkalinity (TA)**

**1kg of HTH® Alkalinity Up should raise the TA by approximately 10ppm.**

1. To prevent possible staining from metals that may be present in your water, add 1 bottle of HTH® Metal Remover – follow label directions.
2. With the pump off, add 1kg of HTH® Alkalinity Up to one spot in the deep end of the pool.
3. Leave the pump off for 15 minutes.
4. Switch the pump on and continue with normal filtration.
5. After 12 hours, check the TA level.
6. If necessary, repeat the process of adding HTH® Alkalinity Up until the ideal range is reached.

### **Recommended Products:**

HTH® Metal Remover

HTH® Alkalinity Up

HTH® 4-in-1 Test Kit or HTH® Quick Test Strips

**All dosages are based on an average pool with a capacity of 50 000 litres.**

**Adjust according to your pool size, regional variations and weather conditions.**
