Basic Pool Maintenance

Maintain Levels

To prevent skin & eye irritation, staining, and damage to linings.

pH levels: 7.2-7.6 (Marbelite pools) 7.0-7.2 (Fiberglass pools)	**Test Frequency** Weekly
Chlorine levels: 1 - 3ppm	**Test Frequency** Weekly
Total Alkalinity (TA) levels: 80 -120ppm	**Test Frequency** Monthly
Copper/Iron levels: 0	**Test Frequency** Once per season
Stabiliser (Cyanuric acid) levels: Less than 50ppm *NB: High stabiliser levels may result in insufficient free chlorine and harmful bacteria in your pool.* **Please follow label instructions when adding products to the pool**	**Test Frequency** At least once per season Test monthly when using floaters

Filtering hours

NB: Hours may vary due to pool volume and pump filters throughout.
To calculate your pool volume: **Length x Width x Depth x 1000**

Summer	**12hrs per night**
Winter	**6 - 8hrs per night**

Backwash/Rinse

When your automatic pool cleaner becomes sluggish, backwash the filter for 2 minutes and rinse the filter for 20 seconds.	**Frequency** Every 2 weeks

Remove debris

Clear pump and weir baskets	**Frequency** Weekly
Brush pool walls and floor	**Frequency** Weekly
