All you need for a crystal clear swimming pool

We know how much you love and enjoy your pool. HTH® is dedicated to maintaining yours crystal clear and ensuring safe water use, whether you're a professional, enthusiast, or an everyday hero who safeguards us around water.

We are committed to providing solutions for a sustainable world, where everyone has the confidence, products, and skills necessary to enjoy water safely. We offer easy-to-use HTH® products for your pool.

NOW...

A young child with blonde hair and goggles is swimming underwater in a pool. The child is smiling and splashing water around them. The water is clear and blue. The pool's edge with a blue and white patterned tile is visible in the background.

YOU'RE ALL CLEAR WITH HTH

DISINFECTANT

The HTH® Disinfectant range is designed to combat harmful bacteria and algae in your pool. Our solutions include daily granular dosing, weekly treatments, and convenient monthly floaters. Choose the option that best fits your maintenance routine.

ALGAECIDE

HTH® Algaecides effectively control all types of algae, from mild green water discoloration to stubborn black algae growth. Our copper-free formulations offer powerful protection without the risk of staining pool linings.

BALANCE

Balanced water is essential for a crystal clear pool. Our comprehensive HTH® Balance range includes pH, Total Alkalinity and Stabiliser (CYA) adjusters to help you maintain crystal clear pool water with ease.

SHOCK

When your pool needs a quick recovery, HTH® Shock treatments restore chlorine levels and clarity. Whether your pool turns green after a storm or loses chlorine after heavy use, our solutions deliver a powerful boost when you need it most.

SPECIALITY

No matter the pool chemistry challenge, HTH® has a solution. Our HTH® Speciality range includes water clarifiers, stain removers and more to keep your pool in top condition.

ACCESSORIES

The HTH® range of pool accessories includes high-quality brushes and pool nets to keep your pool clean and clear. Made in South Africa, each unit contains more than 14% recycled material for a more sustainable choice.

DISINFECTANT

Pool Chlorine Daily Dosing

A powerful pool sanitiser that has been trusted for generations to keep your pool clean and sparkling. The added mineralsoft™ makes pool water feel gentle like a feather on your skin.

2kg Granular+ Chlorine mineralsoft™

Product code: 2B
Product barcode: 6001385000092
Outer carton barcode: 16001385000099
Units per case: 6

4kg Granular+ Chlorine mineralsoft™

Product code: 4B
Product barcode: 6001385000016
Outer carton barcode: 16001385000013
Units per case: 4

8kg Granular+ Chlorine mineralsoft™

Product code: 8B
Product barcode: 6001385000603
Outer carton barcode: 16001385000600
Units per case: 2

15kg Granular+ Chlorine mineralsoft™

Product code: 15B
Product barcode: 6001385001310

25kg Granular+ Chlorine mineralsoft™

Product code: 25B
Product barcode: 6001385001624

Product description

A non-stabilised granular pool chlorine enhanced with mineralsoft™, designed to make the water gentler on your skin. Registration # L146 of Act 36/1947.

Features and benefits

- Kills algae and bacteria
- Faster dissolve formulation
- Gentler on skin
- Ideal for routine use or shock treatment
- 2kg and 4kg:
Use canister cap for measuring
- 8kg, 15kg, 25kg:
Contains scoop for easy measuring
- Active Ingredient: 60% Calcium Hypochlorite

DISINFECTANT

Floater Monthly Dosing

1.6kg

Floater+

Multi-function stabilised dispenser

Product code: IQ1
Product barcode: 6001385001846
Outer carton barcode: 16001385001843
Units per case: 6

750g

Floater+

Multi-function stabilised dispenser

Product code: SPF
Product barcode: 6001385001853
Outer carton barcode: 16001385001850
Units per case: 12

Product description

A powerful slow release sanitiser with a quick dissolve clarifier and a built-in shock treatment. It's the all-round pool care solution trusted to keep your pool in top condition for an entire month.

It's clear - it works!

Registration # L6842 of Act 36/1947.

Features and benefits

- Contains slow-release stabilised chlorine
- Multi-functional product that sanitises, clarifies and shock treats your pool
- Helps to prevent and kill algae
- See-through floater so you know when it's time to replace
- 1.6kg is ideal for pool sizes from 30,000 to 70,000 litres (medium to large pools)
- 750g is ideal for pool sizes from 10,000 to 30,000 litres (small pools)
- Active Ingredients: *Trichloroisocyanuric, Sodium Dichloroisocyanuric Acid and Boric Acid.*

1.5kg

Slow Release

Non-stabilised dispenser

Product code: NSF
Product barcode: 6001385000962
Outer carton barcode: 16001385000969
Units per case: 6

Product description

A convenient monthly pool care solution that sanitises your pool water without causing over-stabilisation.

It is suitable for swimming pools up to 50 000 liters.

Registration # L10046 of Act 36/1947.

Features and benefits

- Contains non-stabilised chlorine that will not cause chlorine lock
- Contains slow-release chlorine tablets
- Kills bacteria and algae
- Designed to last for 4 weeks (depending on pool conditions)
- Ideal for medium size pools
- Active Ingredients: *Calcium Hypochlorite*

1.5kg
Pace Floater
Stabilised Chlorinator

Product code: PFD
Product barcode: 6001385000283
Outer carton barcode: 16001385000280
Units per case: 6

720g
Pace Floater
Stabilised Chlorinator

Product code: PFS
Product barcode: 6001385001730
Outer carton barcode: 16001385001737
Units per case: 12

Product description

A convenient pool care sanitiser designed to last up to 4 weeks. This product contains an added clarifier to help keep your pool water clear and sparkling. Registration # L4709 of Act 36/1947.

Features and benefits

- Contains slow-release stabilised chlorine
- Contains added clarifier tablet
- Always maintain stabiliser below 50ppm to ensure chlorine performs at its best
- 1.5kg is ideal for pool sizes from 30,000 to 70,000 litres (medium to large pools)
- 720kg is ideal for pool sizes from 10,000 to 30,000 litres (small pools)
- Active Ingredient: *Trichloroisocyanuric Acid*

DISINFECTANT

Active Pool Chlorine

Daily Dosing

2.75 kg

Ultra Chlorine

With active algaecide

Product code: ULTRA
Product barcode: 6001385001631
Outer carton barcode: 16001385001638
Units per case: 6

Product description

The strongest chlorine in the HTH® product range. Its unique sanitiser formula makes it suitable for use as a shock or for regular pool care. Give your pool that extra TLC with high-strength chlorine. Registration # L7109 of Act 36/1947.

Features and benefits

- Contains **high-strength** granular chlorine
- Contains **active algaecide**
- Contains non-stabilised chlorine that will not cause chlorine lock
- Kills bacteria and algae
- Fast-dissolve and quick-acting formulation
- Active Ingredient: 72% Calcium Hypochlorite

DISINFECTANT

Pool Chlorine Weekly Dosing

2kg (10 tablets)

HTH® Chlorine Tablets

Chlorinator

Product code:	24
Product barcode:	6001385001723
Outer carton barcode:	16001385001720
Units per case:	12

Product description

A convenient and effective water sanitising solution that helps prevent the growth of algae and harmful bacteria responsible for turning pool water green. Ideal for maintaining consistently clean and clear water with minimal effort. Registration # L7760 of Act 36/1947.

Features and benefits

- Kills algae and bacteria
- Easy to place tablets in a floating basket or directly into the weir
- Do not place directly on the pool lining
- Easy to follow dosage table
- 1 tablet is ideal for pool sizes up to 30,000 liters
- 200g per chlorine tablet
- Active Ingredient: *Calcium Hypochlorite*

1.2kg

Clear4weeks™

All-in-One solution

Product code:	C4W
Product barcode:	6001385001549
Outer carton barcode:	16001385001546
Units per case:	8

Product description

A convenient weekly pool care solution that sanitise, clarify and fight algae in your pool. Contains 4 weekly doses of non-stabilised chlorine that are designed to treat your swimming pool for an entire month. Registration # L8223 of Act 36/1947.

For best results use with HTH® Clear4weeks Shock.

Features and benefits

- Convenient all in one pool care solution
- Contains non-stabilised chlorine that will not cause chlorine lock
- The added clarifier and algaecide help to keep your pool water sparkling blue
- Weekly doses for easy pool maintenance
- Conveniently packed: 4 x 200g pouches of chlorine AND 1 x 400g silver booster pack with an algaecide/clarifier blend
- Ideal for pool sizes up to 50,000 litres (medium pools)
- Active Ingredients: BOOSTER (x1): *Zinc Sulphate, Copper Sulphate and Aluminium Sulphate*. WEEKLY DOSE (x4): *Calcium Hypochlorite*.

Eliminates Algae Preventative and/or Treatment

1L

HTH® All-in-1 Algaecide Micro

Kills green, black and mustard algae

Product code: ALLM1
Product barcode: 6001385001198
Outer carton barcode: 16001385001195
Units per case: 6

Product description

A concentrated high-strength algaecide formulation that can be used against all types of algae. This product also contains a water clarifier that helps to remove dead algae from the water through the pool filter.
Registration # L7591 of Act 36/1947.

Features and benefits

- Treats all types of algae (green, mustard, and black)
- Concentrated formula with added sparkle clarifier
- 1L micro = 2L strength
- Quick-acting formulation
- Active Ingredients: *N-Alkyl Benzyl Dimethyl Ammonium Chloride, Didecyl Dimethyl Ammonium Chloride.*

2L

HTH® All-in-1 Algaecide

Kills green, black and mustard algae

Product code: ALL2
Product barcode: 6001385001037
Outer carton barcode: 16001385000938
Units per case: 6

Product description

A high-strength algaecide formulation that can be used against all types of algae. This product also contains a water clarifier that helps to remove dead algae from the water through the pool filter.
Registration # L6848 of Act 36/1947.

Features and benefits

- Treats all types of algae (green, mustard, and black)
- Contains added sparkle clarifier
- High-strength quick-acting formulation
- Active Ingredients: *N-Alkyl Benzyl Dimethyl Ammonium Chloride, Didecyl Dimethyl Ammonium Chloride.*

2L

HTH® Ultra Clear

Algaecide and water clarifier

Product code: UC2
Product barcode: 6001385001006
Outer carton barcode: 16001385001003
Units per case: 6

Product description

This product is a dual-action formulation that contains a preventative algaecide and a sparkle clarifier. Add this product on a monthly basis to help manage algae and keep your pool clear and sparkling.
Registration # L5381 of Act 36/1947.

Features and benefits

- Contains an algaecide/clarifier blend
- Kills algae and helps to prevent algae growth
- Contains a sparkle clarifier
- Monthly treatment
- Unique duo treatment system
- Active Ingredients: *N-Alkyl Benzyl Dimethyl Ammonium Chloride, Oxyethylene Bis (Alkyldimethyl Ammonium Chloride), Poly (Oxyethylene (Dimethyliminio) Ethylene (Dimethyliminio)) - Ethylene Dichloride.*

1L
HTH® Green Algaecide Micro
 Kills green algae

Product code: GAM6
 Product barcode: 6001385001051
 Outer carton barcode: 16001385001058
 Units per case: 6

Product description

This product is a concentrated algaecide formula used to treat pool water with a slight green tinge/hue and prevent algae problems from getting out of hand. It also contains a built-in flocculant to trap fine particles and add sparkle to your pool.
 Registration # L7591 of Act 36/1947.

Features and benefits

- Kills and removes green algae
- Concentrated formula with added sparkle clarifier
- Use 1L of this product for every 50 000 liters of water
- Active Ingredients: *N-Alkyl Benzyl Dimethyl Ammonium Chloride, Didecyl Dimethyl Ammonium Chloride.*

2L
HTH® Green Algaecide
 Kills green algae

Product code: GA2
 Product barcode: 6001385001013
 Outer carton barcode: 16001385001010
 Units per case: 6

Product description

This product is used to treat pool water with a slight green tinge/hue and prevents algae problems from getting out of hand. It also contains a built-in flocculant to trap fine particles and add sparkle to your pool.
 Registration # L3738 of Act 36/1947.

Features and benefits

- Kills and removes green algae
- Adds sparkle to your pool water
- Use 2L of this product for every 50 000 liters of water
- Active Ingredients: *N-Alkyl benzyl Dimethyl Ammonium Chloride, Didecyl Dimethyl Ammonium Chloride.*

1L
HTH® Black Algaecide Micro
 Kills black algae

Product code: BAM6
 Product barcode: 6001385001068
 Outer carton barcode: 16001385001065
 Units per case: 6

Product description

This product is the strongest algaecide formulation in the HTH® product range and is specifically designed to treat black algae on pool linings.
 Registration # L5622 of Act 36/1947.

Features and benefits

- High strength formulation
- Does not contain copper that could cause stains
- Concentrated fast-acting formulation
- Active Ingredients: *Alkyl dimethyl Benzyl Ammonium Chloride, Didecyl Dimethyl Ammonium Chloride.*

BALANCE

pH and TA Adjusters

Increases pH and TA levels

A well balanced swimming pool requires maintaining key water parameters, such as Total Alkalinity, pH and stabiliser, within their optimal ranges. These elements work together to maximise the effectiveness of the disinfectants.

**1 kg****HTH® Alkalinity Up**

Increases total alkalinity (TA)

Product code: AU1
 Product barcode: 6001385000528
 Outer carton barcode: 16001285000525
 Units per case: 6

**3kg****HTH® Alkalinity Up**

Increases total alkalinity (TA)

Product code: AU
 Product barcode: 6001385000184
 Outer carton barcode: 16001385000181
 Units per case: 6

Product description

An easy-to-dose free-flowing powder that is ideal for increasing pH and Total Alkalinity in swimming pools.

Features and benefits

- Helps to keep pH levels stable
- Raises Total Alkalinity
- Can also be used to raise pH
- Use 1 kg of this product to raises the TA of 50 000 liters of water by 10ppm
- Safe for use on all pool linings
- Active Ingredient: *Sodium Bicarbonate*

**500g****HTH® Soda Ash**

Increases pH

Product code: SA6
 Product barcode: 6001385001808
 Outer carton barcode: 16001385001805
 Units per case: 6

Product description

A fast-dissolve product used to keep your pH levels within the recommended range. Pre-dissolve this product in a bucket of water to easily increase the pH level in the pool.

Features and benefits

- Used to increase pH level
- For use on marbelite linings only (do not use on fibreglass or vinyl pool linings)
- Contains 500g Soda Ash + free 10%
- Active Ingredient: *Sodium Carbonate*

BALANCE

pH and TA Adjusters

Lowers pH and TA levels

5L

HTH® Easy Acid™

Lowers pH

Product code: VEA4
 Product barcode: 6001385001648
 Outer carton barcode: 16001385001645
 Units per case: 3

Product description

This product is the perfect solution to reduce pH levels in your swimming pool. It is ideal for preventing stains, treating cloudy water and help to prevent your eyes and skin from itching when swimming. Use with non-stabilised pool chlorine for best results.

Features and benefits

- Used to reduce pH and Total Alkalinity
- Easy to use measuring strip on side of the container
- Can also be used to raise pH
- Container is designed to assist in effective product dosing
- Easy-dose table
- Active Ingredient: *Hydrochloric Acid*

3kg

HTH® Dry Acid

Lowers pH

Product code: DA
 Product barcode: 6001385000054
 Outer carton barcode: 16001385000051
 Units per case: 6

Product description

This product is a convenient alternative to liquid pool acid that is used to reduce pH levels in your swimming pool. Maintain pH levels within the recommended range to treat cloudy water, prevent stains on the pool lining and prevent your eyes and skin from itching or burning.

Features and benefits

- Used to reduce pH and Total Alkalinity levels
- Fast-dissolve formula
- Convenient to use, will not splash when added to water
- Safer to handle than liquid acid
- Active Ingredient: *Sodium Hydrogen Sulphate*

1kg

HTH® Stabiliser

Increases stabiliser (CYA) level

Product code: STA
 Product barcode: 6001385000375
 Outer carton barcode: 16001385000372
 Units per case: 12

Product description

This product helps to make the chlorine in your pool last longer by protecting it from the sun. Ideal for use with non-stabilised chlorine in outdoor pools.

Features and benefits

- Protects chlorine from UV sun rays
- Increases the stabiliser (CYA) level in pool water
- Helps retain chlorine for longer
- Promotes cost-effective pool care
- Not for use with stabilised chlorine products
- Always maintain stabiliser (CYA) levels below 50ppm
- Active Ingredient: *Cyanuric Acid*

Pool Water Testing Weekly

The primary cause of many pool issues can often be attributed to water parameter levels falling outside their recommended ranges. To prevent common pool problems, it is advisable to test your pool parameters on a weekly basis. By staying proactive in monitoring these levels, you can effectively address any potential issues before they escalate.

25 strips

HTH® Early Warning Test Strips

Testing for free chlorine, total alkalinity, pH & stabiliser

Product code:	TS25
Product barcode:	6001385000153
Outer carton barcode:	16001385000150
Units per case:	12

Product description

Contain 25 dipping strips that will give accurate indications on free chlorine, pH, total alkalinity (TA), and stabiliser (CYA) levels. Test your pool water once a week to ensure that pool water is healthy and balanced.

Features and benefits

- Easy to use
- Simply dip and match
- Each container has 25 strips to last one swimming season
- Convenient colour chart to compare strips that provide instant results
- Air tight container to keep strips dry

Box

HTH® 3 in 1 Test Kit

Testing for chlorine, pH & total alkalinity

Product code:	TK6
Product barcode:	6001385000191
Outer carton barcode:	16001385000198
Units per case:	6

Product description

This kit comes in a handy and durable dark grey box containing all you need to measure the most important swimming pool water parameters. Measure free chlorine, pH and Total Alkalinity, once a week to check if the water is healthy and balanced.

Features and benefits

- Easy to use
- Comes in a durable, reusable container
- Contains reagents to test free chlorine, pH and Total Alkalinity
- Contains test vial with colour chart for free chlorine and pH measurement
- 1 kit contains enough for 50 tests

Bottle 1 contains:	Orthotolidine; Hydrochloric Acid.
Bottle 2 contains:	Phenol Red.
Bottle 3 contains:	Hydrochloric Acid.
Bottle 4 contains:	Bromocresol Green.

Note: This test kit does not contain reagents for the testing of Stabiliser (CYA) levels.

Recommended Water Parameters

Free Chlorine	1 – 3 ppm
pH	7.2 – 7.6 (marbelite pools)
pH	7.0 – 7.4 (vinyl & fiberglass pools)
Total Alkalinity (TA)	80 – 120ppm
Stabiliser (CYA)	Less than 50ppm
Copper/Iron	0 ppm

**SHOCK****Boost**

Increases Chlorine Levels

Powerful shock treatment products will rapidly increase chlorine levels in your pool. This fast dissolving formula is perfect for quickly transforming green pools into clear, sparkling blue water.

**600g****HTH® Super Shock It®**

Treats medium to large pools

Product code:	SS6
Product barcode:	6001385000689
Outer carton barcode:	26001385000683
Units per case:	12
Outer carton barcode:	16001385000686
Units per case:	24

Product description

This product is a high-strength shock treatment that helps to instantly increase the chlorine levels in your pool. Add this fast-dissolve formulation to your pool whenever it needs an extra boost of chlorine to help keep it blue and sparkling. Registration # L5361 of Act 36/1947.

Features and benefits

- Kills bacteria and algae
- High-strength chlorine shock formulation
- Contains non-stabilised chlorine that will not cause chlorine lock
- Contains 600g of high-strength chlorine with 70% available chlorine
- Active Ingredient: *Calcium Hypochlorite*

**500g****HTH® Shock It®**

Treats medium to large pools

Product code:	SI500G12
Product barcode:	6001385001815
Outer carton barcode:	26001385000133
Units per case:	12
Outer carton barcode:	16001385000136
Units per case:	24

Product description

This product is a powerful shock treatment that helps to instantly increase the chlorine levels in your pool. This fast-dissolved formulation is ideal to help turn green pools blue and sparkling. Registration # L5337 of Act 36/1947.

Features and benefits

- Perfect for helping to kill bacteria and algae
- Ideal for use after excessive weather conditions (dust, storms, excessive bather load) or when chlorine levels are exceptionally low
- Contains a high-strength, fast-dissolving formula
- Contains non-stabilised chlorine that will not overstabilise your pool
- Contains 500g with 68% available chlorine
- Active Ingredient: *Calcium Hypochlorite*

TIP: In case of a vinyl or coloured lining, add directly into the weir to prevent bleaching.

**2 x 150g = 300g****HTH® Plunge Pool Shock It®**

Treats plunge pools up to 15 000L

Product code:	PPSI
Product barcode:	6001385001303
Outer carton barcode:	16001385001300
Units per case:	12

Product description

This product is a powerful shock treatment that helps to instantly increase the chlorine levels in your pool water up. It comes in 2 x 150g pouches to use each pouch as needed for smaller pools. This fast-dissolved formulation is ideal to help turn green pools blue and sparkling. Registration # L5337 of Act 36/1947.

Features and benefits

- Perfect for helping to kill bacteria and algae
- Ideal for use after excessive weather conditions (dust, storms, excessive bather load) or when chlorine levels are exceptionally low
- Contains a high-strength, fast-dissolving formula
- Contains non-stabilised chlorine that will not overstabilise your pool
- Contains 2 x 150g = 300g with 68% available chlorine
- Active Ingredient: *Calcium Hypochlorite*

TIP: In case of a vinyl or coloured lining, add directly into the weir to prevent bleaching.

**SHOCK****Boost**

Increases Chlorine Levels

**500g****HTH® Clear4weeks™ Shock**

Treats medium to large pools

Product code:	C4WS
Product barcode:	6001385001570
Outer carton barcode:	16001385001577
Units per case:	12

Product description

This product is a once-off shock treatment pouch ideal for topping up your chlorine level as needed. Registration # L8264 of Act 36/1947.

Features and benefits

- Kills bacteria and algae
- Contains non-stabilised chlorine that will not cause chlorine lock
- Fast-dissolving and quick-acting formula
- The perfect complimentary product to HTH® Clear4weeks™ All-in-One
- Active Ingredient: *Calcium Hypochlorite*

**2.2kg****HTH® Green to Blue™**

Turns green water blue in 24 hours*

Product code:	GTB6
Product barcode:	6001385001518
Outer carton barcode:	16001385001515
Units per case:	6

Product description

This is a two-step multifunctional pool care solution that sanitises and clarifies problematic pool water. This product contains 1 pouch of non-stabilised chlorine shock and 1 pouch of pH balancer/clarifier blend. This product is ideal to restore your pool water after adverse conditions like thunderstorms or a high bather load. Registration # L5337 of Act 36/1947.

Features and benefits

- Kills algae and bacteria
- Turns green pools blue in 24 hours (*if water parameters are within the recommended range)
- Reduces pH and Total Alkalinity levels
- Contains a water clarifier
- Contains: 1x pouch chlorine shock treatment (non-stabilised) and 1x pouch pH balancer/ water clarifier blend
- Active Ingredient: *Calcium Hypochlorite*

Note: This box also includes a single HTH® Sparkle It Cube.

TIP: In case of a vinyl or coloured lining, add directly into the weir to prevent bleaching.

Shock Treating Your Pool Water

Shock treatment is a highly effective way to deal with a green pool. It rapidly eliminates algae and harmful bacteria that cause discolouration and poor water quality.

Use any of the HTH® shock treatment products to treat green pool water after adverse weather conditions such as dust or rainstorms, or following a high bather load – like after a pool party – to quickly restore chlorine levels and sanitise the water. Always test the chlorine level after shock treatment and ensure it is below 3 ppm before swimming again.

SHOCK TREATMENT TIPS:

- ✓ Ensure the stabiliser (CYA) level is below 50 ppm before applying any shock treatment.
- ✓ For best results, confirm that all other water balance parameters – pH and total alkalinity (TA) – are within the recommended ranges.
- ✓ You can also use 3 cups of HTH® Granular+ mineralsoft™ as a shock treatment option.
- ✓ Add a shock treatment late afternoon to early evening to reduce the amount of chlorine broken down by the sun, leaving it available to react with any contaminants in the water.
- ✓ Shock treating your pool once a week can help prevent up to 90% of common pool water problems.

SPECIALITY

A wide variety of carefully formulated chemicals designed to maintain the optimal health and safety of your pool.

1L

HTH® Xtreme Flocc

Water clarifier

Product code: EXTFL
Product barcode: 6001385001433
Outer carton barcode: 16001385001430
Units per case: 6

Product description

A powerful liquid clarifier that is ideal to help treat severely green or cloudy swimming pools. Once added, this product will cause any material in the pool to settle to the bottom, allowing for easy removal through manual vacuuming. It is the perfect solution to restore your pool back to its sparkling blue condition.

Features and benefits

- Clarifies water
- Fast acting
- For severely green or cloudy water
- Use 1 L for every 50,000 liters of water
- Active Ingredient: *Aluminium Hydroxychloride*

Note: Manual vacuuming required.

1L

HTH® Sparkle It™

Water clarifier

Product code: SPI6
Product barcode: 6001385001075
Outer carton barcode: 26001385001079
Units per case: 6

Product description

A convenient liquid water clarifier that can be used to remove suspended solids, dust, and other particles from pool water through the filter. Add this product to put the shimmer back into your pool.

Features and benefits

- Makes pool water sparkle overnight
- Ideal for slight green or cloudy water
- No need for manually vacuuming
- Fast acting clarifier
- Suitable for pools with no weir basket
- Active Ingredient: *Aluminiumhydroxidechloride*

1L

HTH® Metal Remover

Treats high metal content

Product code: MR6
Product barcode: 6001385000177
Outer carton barcode: 26001385000171
Units per case: 6

Product description

Metals like copper and iron are introduced to pool water by certain pool products, low levels of pH and TA for extended periods and certain water sources like borehole water. This product binds to metals, keeping them in solution, thereby preventing them from depositing onto the pool lining. Metal remover also reduces scaling and could lead to cloudy water after application. For best results follow up with a clarifier treatment.

Features and benefits

- Helps to remove metal and organic stains from pool linings
- Use 1 L for every 50,000 liters of water
- Can remove scale from pool linings
- Ideal for use with borehole water
- Active Ingredient: *Di-Phosphonic Acid (HEDP)*

450 g

HTH® Filter Cleaner

Solution changes colour as it cleans

Product code: CIFC
Product barcode: 6001385001945
Outer carton barcode: 16001385001942
Units per case: 6

Product description

This product is a fast-dissolve formula that helps to remove scale from filter sand to enhance pool filter performance and extend the lifespan of filter sand. Use this product at the start of the swimming season to improve pool filtration and help keep your pool in mint condition.

Features and benefits

- Colour change from dark pink to yellow when filter sand is cleaned
- Improves pool filter performance
- Extends life of filter sand
- Cleans all types of pool filters
- Active Ingredient: *Sodium Hydrogensulphate*

SPECIALITY

1 cube

HTH® Sparkle It™ Cube

Overnight water clarifier

Product code: SPIC
Product barcode: 6001385001426
Outer carton barcode: 16001385001423
Units per case: 6

Product description

This cube is a gel block that helps to trap fine dust and debris in the pool filter to keep your pool water clear. Add some magic to your pool by adding the cube directly to your weir to clear cloudy water overnight.

Features and benefits

- Makes pool water sparkle overnight
- Fast-acting water clarifier
- Ideal for slight green or cloudy water
- Ideal for use with borehole water

Note: Remove the cube from the packaging before adding it to the weir or skimmer basket.

1 cube

HTH® Clear Blu®

Water clarifier

Product code: CB6
Product barcode: 6001385000221
Outer carton barcode: 16001385000563
Units per case: 6
Outer carton barcode: 26001385000560
Units per case: 12

Product description

A slow-dissolve gel clarifier that gradually releases a flocculant to help trap debris and small particles in the pool filter. Use this product to maintain clear and sparkling water in your pool.

Features and benefits

- Adds sparkle to pool water
- Slow-release clarifier that lasts longer than a week (depending on pool conditions)
- Enhances chlorine performance in the pool

Note: Remove the cube from the packaging before adding it to the weir or skimmer basket.

1 kg

HTH® Stain Lift & Prevent

2 in 1 action on stains

Product code: SLP
Product barcode: 6001385001938
Outer carton barcode: 16001385001935
Units per case: 6

Product description

Metals like copper and iron are introduced to pool water by certain pool products, low levels of pH and TA for extended periods, and certain water sources like borehole water. 1 pouch of stain lift is used to remove metal stains from pool lining. 1 pouch of stain prevent is used to keep metals from re-depositing.

Features and benefits

- Both treatments in 1 pack
- Contains 1 pouch of stain lift formulation
- Contains 1 pouch of stain prevent formulation
- Ideal for use on localised metallic stains
- Active Ingredients: *Sodium Sulphite and Citric Acid*

ACCESSORIES

High-quality, eco-friendly equipment made from recycled materials, which provides everything you need to maintain a clean and healthy pool environment.

1 8 Wheel Sweeper

Product code: 8WS
Product barcode: 6001385001778
Outer carton barcode: 16001385001775
Units per case: 6

Features and benefits

- Contains recycled plastic
- 3-year manufacturing warranty
- Fits all brands of standard aluminium poles
- Contains built-in sun protection
- Durable wheels - won't damage pool lining
- Safe for use on fibreglass lined pools

1 Algae Brush

Product code: AB6
Product barcode: 6001385000405
Outer carton barcode: 26001385000409
Units per case: 6

Features and benefits

- Contains recycled plastic
- 3-year manufacturing warranty
- Fits all brands of standard aluminium poles
- Contains built-in sun protection
- Durable nylon bristles - won't damage pool lining
- Safe for use on fibreglass lined pools

1 Curved Pool Brush

Product code: PBR6
Product barcode: 6001385000443
Outer carton barcode: 16001385000440
Units per case: 6

Features and benefits

- Contains recycled plastic
- 3-year manufacturing warranty
- Fits all brands of standard aluminium poles
- Contains built-in sun protection
- Durable nylon bristles - won't damage pool lining
- Safe for use on fibreglass lined pools

1 Leaf Rake

Product code: LR6
Product barcode: 6001385000573
Outer carton barcode: 16001385000570
Units per case: 6

Features and benefits

- Contains recycled plastic
- 3-year manufacturing warranty
- Fits all brands of standard aluminium poles
- Contains built-in sun protection
- Easy to use

1 Leaf Skimmer

Product code: LS6
Product barcode: 6001385000580
Outer carton barcode: 16001385000587
Units per case: 6

Features and benefits

- Contains recycled plastic
- 3-year manufacturing warranty
- Fits all brands of standard aluminium poles
- Contains built-in sun protection
- Easy to use

1 Telescopic Pole

Product code: TP3
Product barcode: 6001385001785
Outer carton barcode: 16001385001782
Units per case: 12

Features and benefits

- 3-year manufacturing warranty
- Fits all HTH® accessories
- Extends up to 3 meters
- Contains 2 x 1.5 meter segments
- Easy to use

ACCESSORIES

2 Nuts & Bolts

Product code: N&B24
 Product barcode: 6001385001761
 Outer carton barcode: 16001385001768
 Units per case: 24

Features and benefits

- For connecting poles to brushes, skimmers and rakes
- Fits all brands of standard aluminium poles

1 Pool Hose Swivel

Product code: PHS
 Product barcode: 6001385000993
 Outer carton barcode: 16001385000990
 Units per case: 6

Features and benefits

- 3-year manufacturing warranty
- Improves pool cleaner performance
- Stops pool hose from tangling
- Automatically regulates water flow
- Reduces pool hose splitting and scuffing
- Increases the area covered by the automatic pool cleaner

1 Thermometer

Product code: THM
 Product barcode: 6001385000115
 Outer carton barcode: 16001385000112
 Units per case: 6

Features and benefits

- Does not contain mercury
- Accurate temperature readings
- Measures in degrees Celsius and Fahrenheit
- Includes cord for securing to the side of the pool.

1 Hose

Features and benefits

- Fits all brands of hoses, ensuring easy integration into any pool system
- Built-in sun protection protects the hoses against UV rays, extending their lifespan
- Maximum flexibility allows for easy maneuverability and positioning where required
- Available in blue, grey and natural colours
- 3-year manufacturing warranty

Product code: PHW12
 Product colour: Natural
 Product barcode: 6001385001181
 Outer carton barcode: 16001385000877
 Units per case: 36

Product code: PHG12
 Product colour: Grey
 Product barcode: 60013850000160
 Outer carton barcode: 16001385000167
 Units per case: 36

Product code: PHB12
 Product colour: Blue
 Product barcode: 60013850000207
 Outer carton barcode: 16001385000204
 Units per case: 36

Choosing between stabilised and non-stabilised chlorine can be a challenge, but understanding the differences will help you maintain a clean and healthy swimming pool.

NON-STABILISED CHLORINE

Using only non-stabilised chlorine products, such as **HTH® Granular+ mineralsoft™ Pool Chlorine** or the **HTH® Slow Release Granular Floater**, leaves free available chlorine vulnerable to rapid breakdown by the sun's UV rays.

To counter this, a small amount of Cyanuric Acid (CYA) can be added to the water to help shield chlorine from sunlight, ensuring it remains effective in killing bacteria, algae, and other harmful organisms.

Since non-stabilised chlorine does not contain CYA, we recommend dosing it in the early evening when the sun is less intense.

STABILISED CHLORINE

An alternative is to use a stabilised chlorine product such as **HTH® Floater+ or Pace™ Stabilised Chlorine Floater**. These products contain chlorine tablets that dissolve gradually, continuously releasing chlorine into the water.

Because stabilised chlorine includes a "built-in" stabiliser, it automatically releases CYA alongside chlorine, providing ongoing UV protection.

Additionally, stabilised chlorine has a lower pH, which generally contributes to clearer water. The active ingredients in stabilised chlorine tablets are typically **Trichloro-isocyanuric Acid (TCCA)** or **Sodium Dichloroisocyanurate (SDCC)**.

Overstabilisation

Understanding

While stabilised chlorine is a convenient and effective solution, improper use can lead to **overstabilisation**. This occurs when CYA levels rise **above 80 ppm**, resulting in a condition known as **CHLORINE LOCK** — *where excessive CYA binds to chlorine, making it ineffective for disinfection.*

Early signs of overstabilisation are not always obvious. In fact, the low pH of stabilised chlorine tablets may initially keep the pool looking crystal clear. However, over time, the water can develop a luminous green tint, even if test strips indicate sufficient chlorine levels.

There are currently no pool chemicals available to remove excess Cyanuric Acid. The only solution is to **drain a portion of the pool water and replace it with fresh water.**

Preventing

To maintain optimal CYA levels and avoid chlorine lock, follow these best practices:

1. **Test your water weekly** with HTH® Early Warning Test Strips to ensure CYA levels stay **below 50 ppm**.
2. **Backwash your filter every two weeks** to remove excess CYA and replenish the pool with fresh water.
3. **Alternate between non-stabilised and stabilised chlorine products** to minimise the accumulation of CYA.
4. **Look for the "Prevents Chlorine Lock" icon** on our non-stabilised chlorine products to identify options that won't increase CYA levels.
5. **If using only non-stabilised chlorine**, CYA can be purchased separately as **HTH® Pool Stabiliser** and added as needed.
6. **Always choose the correct chlorine floater size** for your pool to prevent overstabilisation from the start.

By following these guidelines, you can enjoy a healthy, crystal-clear pool all year round.

CHECK EQUIPMENT

Ensure the pump, filter and automatic pool cleaner are in good working order.

KNOW THE SIZE OF YOUR POOL

Calculate the size of your pool to add the correct amount of HTH® product.

READ PRODUCT LABELS

Carefully read and follow directions on all product labels to ensure the best performance out of HTH® products.

CLEAR BASKETS

WEEKLY

Remove any leaves and debris from the pump and weir baskets to ensure good water flow to the pump and filter.

REMOVE LEAVES & DEBRIS

WEEKLY

Brush the pool walls and physically remove any leaves and visible debris from the pool water.

BACKWASH & RINSE

BI-WEEKLY

Backwash for 2 minutes and then rinse for 20 seconds every second week or when the automatic pool cleaner becomes sluggish.

TEST

WEEKLY

Test the pool water weekly to check whether all pool water parameters are within the recommended ranges.

BALANCE

WEEKLY / AS NEEDED

Free Chlorine	1 – 3 ppm
pH	7.2 – 7.6 (marbelite pools)
pH	7.0 – 7.4 (vinyl & fiberglass pools)
Total Alkalinity (TA)	80 – 120ppm
Stabiliser (CYA)	Less than 50ppm
Copper/Iron	0 ppm

SHOCK TREATMENT

WEEKLY / AS NEEDED

Add any HTH® Shock product or 3 cups of HTH® Granular+ Chlorine after severe weather conditions or higher bather load.

Filtering times measured in hours.

Pool Size	Filter Size: 2 Bag Pump Size: 0.6kW	Filter Size: 3 Bag Pump Size: 0.75kW	Filter Size: 4 Bag Pump Size: 1.1 kW
10 000 L	2 hours	2 hours	1.5 hours
15 000 L	3 hours	2.5 hours	2 hours
20 000 L	4 hours	3 hours	3 hours
25 000 L	5 hours	4 hours	3.5 hours
30 000 L	6 hours	5 hours	4 hours
35 000 L	7.5 hours	5.5 hours	5 hours
40 000 L	8.5 hours	6.5 hours	5.5 hours
45 000 L	9.5 hours	7 hours	6 hours
50 000 L	10.5 hours	8 hours	7 hours
60 000 L	13 hours	10 hours	8 hours
70 000 L	15 hours	11 hours	9.5 hours
80 000 L	17 hours	13 hours	11 hours
90 000 L	19 hours	14.5 hours	12.5 hours
100 000 L	21 hours	16 hours	14 hours

Calculation example:

Average pool size = 50,000L, 0,75kW pump and 3 bag filter.

Filtering hours in summer = 8 hours, in winter = 4 hours.

How do I adjust the pH level in my pool?

When pH is too LOW:

1. Use HTH® Soda Ash on marbelite pools or HTH® Alkalinity Up on marbelite or fiberglass lined pools.
2. Follow pack directions, dilute in a bucket of water and pour around the sides of the pool with the pump running.

When pH is too HIGH:

1. Use HTH® Easy Acid or HTH® Dry Acid.
2. Don't add more than 500mL HTH® Easy Acid or 2 cups of HTH® Dry Acid at a time, carefully pour around the sides of the pool with the pump running.
3. Wait 4 hours before repeating.

How do I adjust the Total Alkalinity (TA) level in my pool?

When TA is too LOW:

1. Use HTH® Alkalinity Up.
2. Follow pack directions.
3. With the pump off, add to one spot in the deep end.
4. You can switch the pump on after 20 minutes.
5. Re-test after 12 hours.

When TA is too HIGH:

1. Use HTH® Easy Acid or HTH® Dry Acid
2. Follow pack directions.
3. With the pump off, add to one spot in the deep end.
4. You can switch the pump on after 20 minutes.
5. Re-test after 12 hours.

Do I need to correct my pH or Total Alkalinity (TA) first?

Alkalinity acts as a buffer in the water to prevent excessive pH fluctuations. You should therefore adjust the TA first to a level of 80 – 120 ppm before adjusting the pH.

How do I Shock Treat?

1. Use HTH® Shock It or HTH® Super Shock It or 3 cups of HTH® Granular + Mineralsoft™ Pool Chlorine.
2. Remember to adjust your pH before shock treatment.
3. Do not enter the pool until the free chlorine value is lower than 3 ppm.

Is stabilising my pool necessary?

1. Stabiliser can be added to the pool to help prevent chlorine from being broken down by sunlight.
2. Add HTH® Stabiliser to the pool according to label instructions.
3. Keep in mind that high stabiliser (CYA) levels can cause "chlorine lock" – prevent chlorine lock by maintaining CYA levels around 50 ppm.
4. Both Pace™ Floater and HTH® Floater+ contain built-in stabiliser.

How do I check stabiliser levels in my pool?

1. Use HTH® Early Warning Test Strips
2. The CYA section indicates the stabiliser levels in the pool.
3. Always maintain the CYA level around 50 ppm to prevent "chlorine lock".

How do I get rid of/reduce the stabiliser if my reading is too high?

1. There is no product that you can add to remove stabiliser.
2. Stabiliser levels can only be reduced by draining some of the water from the pool and refilling with fresh water.

I am going on holiday, what product should I use in my pool to keep it blue?

1. Shock treat to boost chlorine, then add a floater.
2. Remember to correct pH, backwash filter and clear baskets first.
3. For more information scan this QR Code.

Can HTH® products be used with a salt chlorinator?

Yes, all our products are compatible with a salt chlorinator.

How do I backwash my pool filter?

1. To ensure best performance, backwash your filter once every 2 weeks or whenever the automatic pool cleaner gets sluggish.
2. Backwash for 2 minutes or until water runs clear out the backwash pipe.
3. Remember to rinse for 20 seconds before you resume filtration.

Why is the chlorine in my pool not working?

1. Ensure that the pH level in the pool is between 7.2 and 7.6.
2. Check the stabiliser (CYA) level – levels higher than 80 ppm could cause chlorine lock and prevent the chlorine from working.

Why is the chlorine in my pool not lasting?

1. Check the pH level and maintain around 7.2.
2. Calculate your pool volume and ensure that sufficient chlorine is added when required.
3. Add HTH® Stabiliser to a level of 50 ppm to protect chlorine against sunlight.
4. Ensure that weir and pump baskets are cleaned regularly.
5. Consider using a slow release chlorine floater.

Is HTH® Granular+ Chlorine stabilised?

No, this is a NON-stabilised product and will therefore not increase CYA levels in the pool. It's quick dissolve, fast acting and can be used on its own or in addition to other pool products.

My chlorine level is too high, how can I reduce it?

1. Check that your pool is not over stabilised (CYA is lower than 50 ppm)
2. If not, let the chlorine dissipate over the next day or two or drain a portion of the water and top up with fresh water.
3. Check that chlorine level is lower than 3 ppm before entering the water.

How long must I wait before entering the pool after I've added chemicals?

It's best practice in terms of safety and product performance to add chemicals to the pool when nobody is swimming.

1. For granular chlorine and shock treatment products: Enter the water once the free chlorine level is below 3 ppm.
2. For pool acid: Allow water to circulate for at least 2 hours.
3. Measure the pH level and only enter the water once levels are between 7.2 and 7.6.
4. For other pool maintenance chemicals (e.g. algaecides, water clarifiers, metal remover) allow water to circulate for at least 12 hours before entering the water.

What is the difference between the Pace™ Floater and the HTH® Floater+?

The HTH® Floater+ has a built-in shock treatment and an algaecide, both contain a slow release sanitiser and a clarifier.

Visit the HTH® Pool Care YouTube channel for guidelines and advice.
